

MACHINED COMPONENTS EFFICIENTLY WITH BEST-IN-CLASS MANUFACTURING TECHNOLOGY

Juhani Haavisto Oy is a Finnish contract machine shop specializing in the serial production and contract manufacturing of machined components. We also deliver sub-assemblies and complete finished products according to customer requirements. We serve both domestic and international OEM customers across all industrial sectors.

MODERN MANUFACTURING TECHNOLOGY – PRECISION, QUALITY, AND PERFORMANCE

Production machinery is optimized for mid-sized machined components to meet high quality, precision, and delivery requirements. A high degree of automation ensures efficient and consistent production. Part of the manufacturing is carried out in unmanned production cells. We use the latest generation of manufacturing technology, such as:

- 5-axis machining centers
- Automated pallet systems (FMS)
- Robotic loading

→ Production capacity and technical specifications Machined components

Dimensions

- Rotationally symmetric parts with diameters up to 2 000 mm
- Milled components with lengths up to 8 000 mm

Materials

- Wide range of materials including carbon steel and alloy steel, stainless steels, duplex, super duplex, super austenitic steels and titanium

Finishing and treatments

- Coatings, grinding, polishing, pickling

Inspection and documentation

- NDT inspections / certificates
- Balancing
- 3D-measurement and inspection reports
- Material certificates
- Pressure testing

→ Services

- Contract manufacturing / serial production
- Special products and single-piece manufacturing
- Sub-assemblies and complete equipment assemblies according to customer needs
- Inventory and stock management services

→ Customer benefits

- High quality precision-machined components
- Fast delivery times - also directly from stock
- Competitive pricing
- Reliable partner with over 40 years of experience in demanding industrial components

→ Machined components for various industries

- Pulp & paper-, metal- and chemical industries as well as water industry
- Energy and power generation
- Construction and mining industries
- Automotive and marine industries

Contact Us – High quality machined components delivered cost-effectively with short lead times
